BUILDING EXTERIOR SOLUTIONS

A Terracon Company

PROJECT SUMMARY

The University of Houston, founded in 1927, is a not-for-profit, state assisted university located in Houston, Texas. The university provides undergraduate and graduate academic programs for over 40,000 students each year. The campus encompasses 667 acres near the central Houston area.

BES has performed as the building envelope consultant representing the University for a number of new construction project since 2008. These projects include Health and Biomedical Science Building, Classroom and Business Building, West Dining Hall, Cougar Place Replacement, Energy Research Park Building 1A* (*currently under construction).

UNIVERSITY OF HOUSTON – CAMPUS EXPANSIONS
